

Life Cycle of the Butterfly

at

Amarillo Botanical Gardens

Did you know?

- A Monarch butterfly can live up to 8 months.

The life of a butterfly...

- Starts with an **egg**

- A **caterpillar** hatches

- The caterpillar wraps itself into a **chrysalis**

- A beautiful **butterfly** emerges!

- **Butterflies** are attracted to the Milkweed plant

- The Amarillo Botanical Gardens have many milkweed plants that attract **butterflies.**

The logo for Amarillo Botanical Gardens features a stylized red letter 'B' that is integrated into the word 'BOTANICAL'. The 'B' is a thick, red, cursive-style letter that loops around the 'O' in 'BOTANICAL'.
