

SENSATIONAL INSECTS

AT THE

AMARILLO BOTANICAL GARDENS

WHAT'S BUGGING YOU?

Is there a difference between bugs and insects?

YES

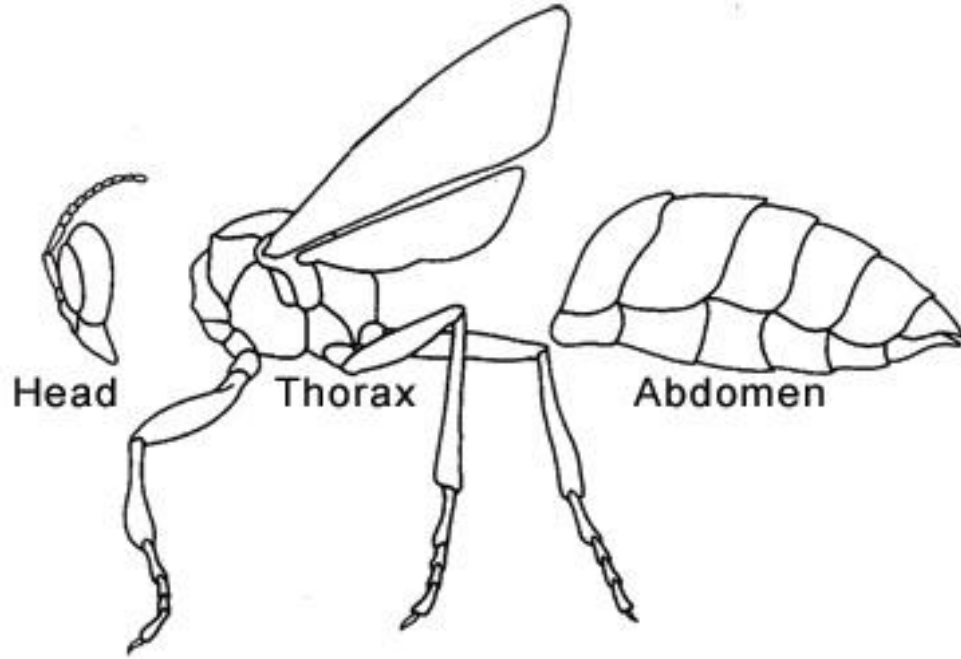

INSECTS

- Insects are invertebrate animals that belong to the phylum *Arthropoda*, class *Insecta*.

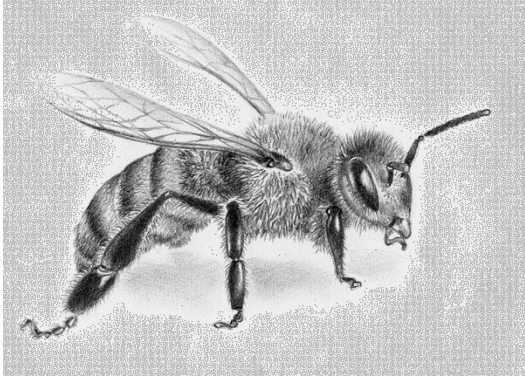

- **Have segmented bodies paired with jointed legs**

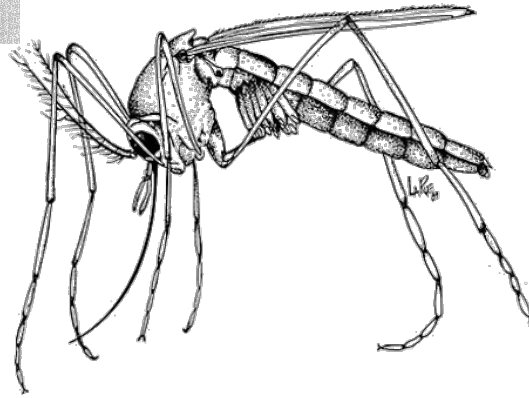

- **Adult insects have 3 body sections:**

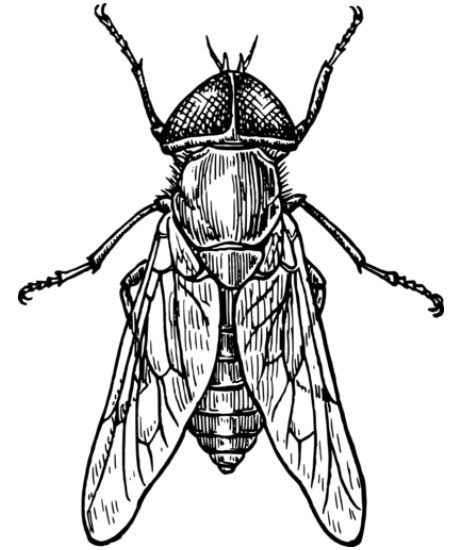

INSECTS:

bee

mosquito

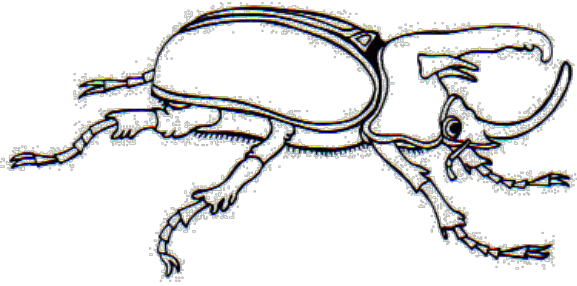

fly

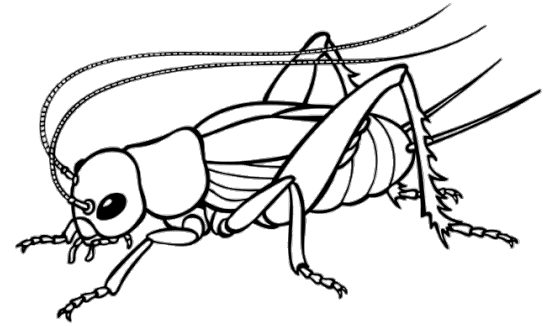

BUGS

- A true “bug” is an insect belonging to the order *Hemiptera*

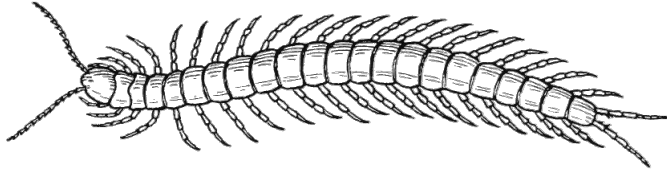

BUGS:

beetle

cricket

centipede

spider

BUT WAIT!

I THOUGHT SPIDERS WEREN'T BUGS?

- **Spiders are also *arthropods*, but belong to a special class called *Arachnida***

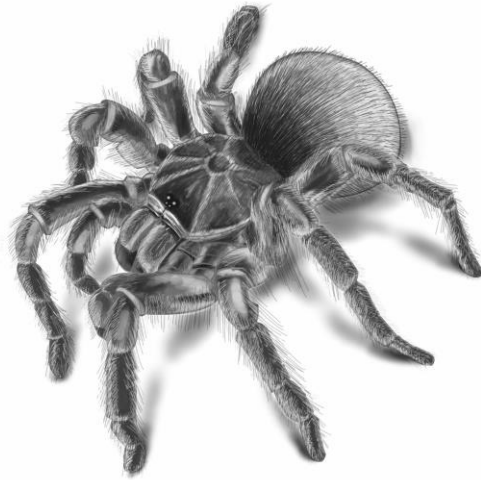

ARACHNIDS

- Have only 2 body parts
 - 8 legs
 - No antennae

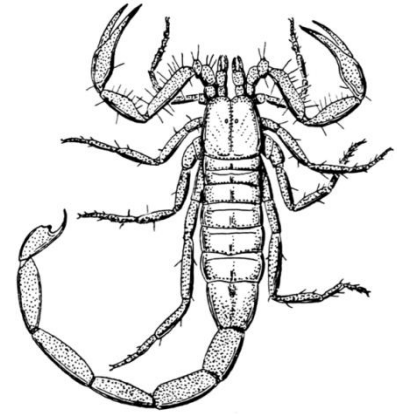

ARACHNIDS

tick

spider

scorpion
